

Consultix Safari™ . High Power CW Kit

Portable meets Powerful

The Safari™ CW transmitter is a portable high-power signal generator engineered particularly for field applications such as outdoor model tuning, candidate site assessment, DAS injection/testing or CW walk-testing.

The RF generator allows full flexibility of user's choice from single, dual or quad port operation with the widest mix of amplifiers in the market from 4 Watts up to 80 Watts covering most of wireless bands from 100 MHz up to 4.2 GHz.

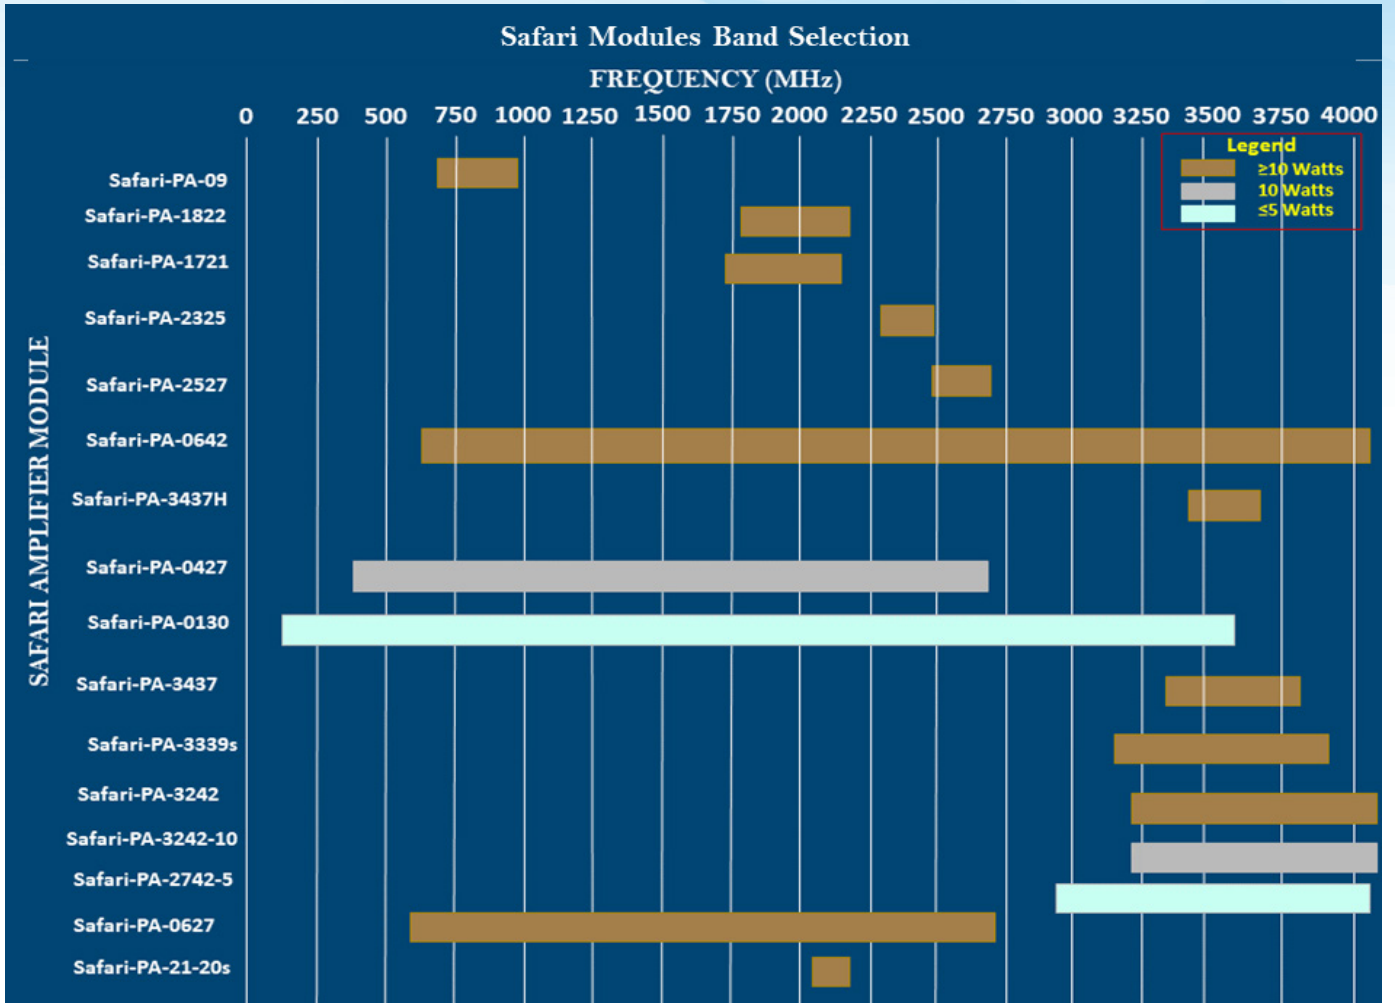

The system is based on Consultix award-winning WTX transmitter which achieved remarkable success globally and has been the preferable choice for hundreds of customers since 2011 due to its field-convenience, wide-band operation and cost-efficiency.
